

AH-DA

Spacer made of plastic for use in in-situ concrete

Plastic spacers AH-DA are available in addition to the basic products for punching shear and shear force reinforcements. These accessories are used in conjunction with the JDA, especially in in-situ concrete. Installing them maintains the required spacing between the reinforcement layers. The spacers are made of plastic and are available in four different versions - for concrete covers of 15, 20, 25 and 30 mm.

Products	H	B	L	weight
AH-DA15/20	33 mm	37 mm	70 mm	0,005 kg
AH-DA25	38 mm	37 mm	70 mm	0,005 kg
AH-DA30	46 mm	37 mm	70 mm	0,006 kg
AH-DA35	57 mm	37 mm	80 mm	0,007 kg
