

BKBRDR-RHP

Floor duct bend cover with radius and anti-slip embossing

The BKBRDR-RHP floor duct bend cover is placed on top of the floor duct bend BKBR and protects cables and supply lines from flying sparks and other mechanical influences. It is 100 to 600 mm wide corresponding to the bend. The floor duct bend cover is made of sendzimir hot-dip galvanized steel with slip resistance class R12. With a maximum compartment size of 200 mm, we guarantee a tested load capacity of 5.00 kN according to EN 50085-2-2. They come with pre-assembled turning bolts.
