

BKDHK

Floor duct cover clamp

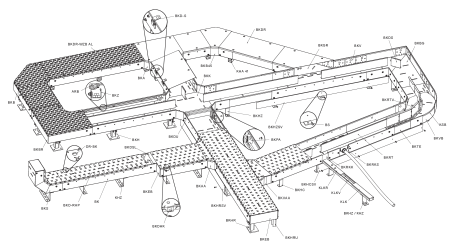

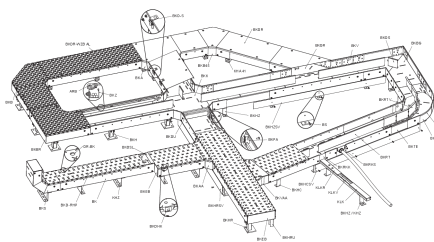

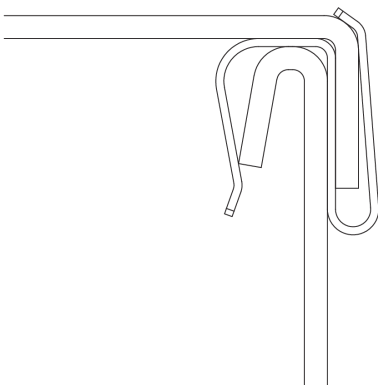

BKDHK floor duct cover clamps are used to fasten floor duct covers to floor ducts. The clamps must be selected as an option, which is particularly recommended for BKD-RHP covers without turning bolts. BKDHK floor duct cover clamps are made of sendzimir hot-dip galvanized steel. They can be opened using the BKDH floor duct cover lifter. We recommend using at least two cover clamps per cover for cover lengths ≤ 200 mm, at least four for ≤ 1500 mm and at least six cover clamps for ≥ 1500 mm.

steel, continuously hot galvanized/Sendzimir process

Products	t	W
BKDHK S	0,70 mm	0,006 kg
