

BKHR

Floor duct holder, height = 108 mm

The BKHR floor duct bracket is used to elevate the floor duct if, for example, media lines are to be installed below the floor duct system. It is advisable to space the supports 1.5 m apart. If the floor duct holder is longer than 400 mm, we recommend using the BKHRU floor duct holder support. The floor duct bracket BKHR is 108 mm high and is made of sendzimir hot-dip galvanised steel.
