

## BKKDR

### Floor duct crossing cover with turning bolts

The BKKDR floor duct crossing cover is placed on top of the floor duct crossing BKK and protects cables and supply lines from flying sparks and other mechanical influences. It is 100 to 600 mm wide corresponding to the crossing. The floor duct crossing cover is made of sendzimir hot-dip galvanised steel and is not embossed. With a maximum compartment size of 200 mm, we guarantee a tested load capacity of 5.00 kN according to EN 50085-2-2. They come with pre-assembled turning bolts.
