

Concrete Spacer Type PT/S

Cast concrete spacer with three feet

PT/S-type concrete spacers are single spacers with three feet. They can be fixed to horizontal and vertical reinforcement using the integrated double plastic clips. These accessories are made of high-quality cast concrete and have a small contact area, which is why they are used in exposed concrete applications. The spacers are tested according to the DBV fact sheet Spacers. They are available for concrete cover depths of 15 to 60 mm.
