

GBHK 50

Short spacer bracket for mesh cable tray grid size 30

Mesh cable trays G and GI can be mounted vertically on the longitudinal wires of the mesh cable tray base at a short distance from the wall using the spacer bracket GBHK 50. For larger mesh cable tray widths, two spacer brackets are required, arranged next to each other. The spacer bracket GBHK 50 is suitable for a mesh cable tray grid size (wire spacing) of 50/75/100 mm and support spacings of up to 1500 mm. We provide components in various materials and surface finishes to ensure that the corrosion requirements are met for all sorts of applications.
