

GRIPRIP®-S

Masonry reinforcement for butt joint anchoring

The construction element GRIPRIP®-S is a structural masonry reinforcement for butt joint anchoring in thin-bed mortar. It improves the strength and crack resistance of masonry and is also suitable as supplementary reinforcement for local reinforcement of screed floors. GRIPRIP®-S is made of high-quality aramid mesh and is 300 mm long and 85 mm wide. Other lengths are available on request.
