

## GVD 30

### Mesh cable tray universal connector

Mesh cable trays of the type GTDW can be mounted quickly and easily in a straight orientation using GVD 30 mesh cable tray connectors. However, the mesh cable tray connector can also be used for horizontal changes in direction (branches) of mesh cable trays G, GI and GTD. The GVD 30 is a set of two GV-L 30 mesh cable tray connectors and a round-head bolt and nut. We provide components in various materials and surface finishes to ensure that the corrosion requirements are met for all sorts of applications.
