

ISOPRO® IP 120 F

ISOPRO® IP 120 F is a thermally insulated connection with a 120 mm insulating body for connecting front parapets with ceiling slabs. It is suitable for transmitting normal forces, moments and horizontal forces. These elements are used at specific points depending on the relevant structural requirements. The stainless steel rebar is resistant to corrosion. It complies with fire protection requirements: ISOPRO® IP 120 F is available for fire protection structures up to REI 90. Please specify the element height and fire protection version when ordering.
