

JAI-L

Elevator insulation

JAI-L elevator insulation is especially suitable for the acoustic decoupling of goods elevators with high load-bearing capacities. This also includes elevators for car parking spaces subsequently integrated into buildings. JAI-L elevator insulation is based on the TÜV-certified JAI-A in sandwich construction and can be used as a system solution with the JTA W anchor channel.

steel, galvanic zinc plated

Products	W
JAI-L1-JB16 GV	0,001 kg
JAI-L1-JC16 GV	0,001 kg

W: Weight per storage unit

OPTIONAL ACCESSORIES

JTA W 40/22, JTA W 50/30
