

## JMK+ EA

The stainless steel Lean Duplex grout-in bracket JMK+ EA is available with load levels of 3.5 and 7.0. The rated resistances are accordingly  $FRd = 4.7 \text{ kN}$  or  $FRd = 9.5 \text{ kN}$ . The condition and load-bearing capacity of the substrate must be checked in advance. The compressive strength of the existing masonry must be at least  $2.1 \text{ N/mm}^2$  and the wall thickness at least 240 mm. If the compressive strength is lower or walls are thinner, a special solution must be developed. The JMK+ EA is available in cantilever lengths of 110 to 330 mm.

Products	L		weight
JMK+250 EA/7.0	250 mm	90 °	0,000 kg
JMK+250 EA/3.5	250 mm	90 °	0,000 kg
