

JMK+ NFT

The stainless steel Lean Duplex grout-in bracket JMK+ NFT is available with load levels of 3.5 and 7.0. The rated resistances are accordingly $FRd = 4.7 \text{ kN}$ or $FRd = 9.5 \text{ kN}$. The condition and load-bearing capacity of the substrate must be checked in advance. The compressive strength of the existing masonry must be at least 2.1 N/mm^2 and the wall thickness at least 240 mm . If the compressive strength is lower or walls are thinner, a special solution must be developed. The JMK+ NFT is available in cantilever lengths of 110 to 330 mm .

Products	L	α	W
JMK+250 NFT/3.5	250 mm	90°	1,957 kg
JMK+250 NFT/7.0	250 mm	90°	3,442 kg
