

KHU 80

Bracket support, heavy, 80x60 mm

The bracket holder KHU 80 can be easily used as a construction profile due to its continuous perforation on three sides. It consists of a U profile 80 x 60 mm (material thickness 5 mm thick). Using the support piece enables higher load-bearing capacities to be achieved. We provide components in various materials and surface finishes to ensure that the corrosion requirements are met for all sorts of applications.

steel, batch/hot-dip galvanized
