

KS

The KS clamping washer is used along with the screw, nut and SLP slanted slit plate to fix the JVAeco+ brickwork support bracket to the anchor channel. When using a suitable dowel, the KS clamping washer is used along with the SLP slanted slit plate to attach it to the shell. Different clamping washers version are available depending on the desired load level.

Products	weight
KS11	0,031 kg
KS13	0,031 kg
KS17	0,028 kg
