

# KTW-R 4-12

cable support trough, Ø 40-120 mm

The KTW-R 4-12 cable support tray with riveted back rail is used for routing cables on walls in a space-saving manner. It is available in widths from 56 to 138 mm and allowing for cable diameters from 40 to 120 mm. The back rail is available in lengths from 237 to 973 mm. It can be installed in one or more tiers. It is dowelled directly to the wall, but can also be attached to profile rails. Support intervals of 700 to 1000 mm must be observed when routing the cables. The cable support tray KTW-R 4-12 is made of hot-dip galvanised steel.
