

KUNEX® ABS Expansion Joint D

Formwork element with expansion joint tape

The component KUNEX® ABS Expansion Joint D is a two-part formwork element. It is used for the easy installation of internal KUNEX® joint tapes in waterproof expansion joints 20mm wide in reinforced concrete constructions. The element is suitable for KUNEX® D240 expansion joint tapes in combination with floor slabs from 240 mm to 500 mm thick. The KUNEX® ABS Expansion Joint D are made of steel DC04 and are 2400 mm long. Other dimensions are also available on request.
