

## KUNEX® D

Expansion joint tape, PVC-P, internal

Internal KUNEX® PVC-P expansion joint tape reliably seals joints in concrete structures. It is installed in the centre of the concrete cross-section. The joint tapes absorb expansion and shear movements and are available according to DIN or with abP (German building code test certificate) in accordance with the factory standard. DIN joint tapes are available in bitumen-compatible versions on request. Joint tapes up to 320 mm wide with fixing eyelets on one or both sides can be supplied on request. The eyelets are spaced 200 mm apart. The eyelets replace the joint tape clips that would otherwise be required to fix the joint tapes in place.
