

LGAA 60

Cable ladder attachment branch, height = 60 mm

The LGAA 60 cable ladder attachment branch allows the direction of cable routing to be changed in the form of a branch. The side rail of the main ladder is cut out accordingly at the point where connecting ladder is to branch off. The LGAA attachment branch is positioned and bolted in place at this point. The connecting ladder can then be pushed in. The cable ladder attachment branch is suitable for cable ladders with rails 60 mm high and is 200 to 600 mm wide. It is made of hot-dip galvanised steel.

steel, batch/hot-dip galvanized
