

LGVV 100

Cable ladder connector, vertical, height = 100 mm

To create vertical changes of direction, LGVV 100 vertical connectors are pushed onto the rails of the cable ladder and bolted in place according to the installation instructions. The connectors can be adjusted to the required angle. The connecting rack is then mounted using the connectors. The connector LGVV 100 is 100 mm high corresponding to the cable ladder and 270 mm long. We provide components in various materials and surface finishes to ensure that the corrosion requirements are met for all sorts of applications.
