

PLURAFLEX® PUR-Foam Type 05 / WEBAC 1405

For sealing cracks and injecting into injection hoses

PLURAFLEX® PUR-Foam Type 05 / WEBAC 1405 is a highly active 2-component injection resin for sealing cracks and injecting through injection hoses. Limited elastic binding of cracks. Minimal foaming when exposed to moisture. Pre-inject with PLURAFLEX® PU foam 50 in the case of pressurised, flowing water. PLURAFLEX® PUR injection resin 05 is suitable for use in drinking water applications and meets the requirements of DIN EN 1504-5.
