

PLURAFLEX® Set XL C11

Accessory set including C11 injection hose

The PLURAFLEX® Set XL C11 set is used, among other things, as a secondary seal to correct unacceptable deviations in the construction joint seal. For example, if the minimum installation depth of coated joint sheets is not complied with. The contents are sufficient for a total of 50 m grouting length for the installation variants routed underneath the formwork and with nail packers on the formwork. They will be delivered within 24 hours. The set consists of: • PLURAFLEX® C11, 1 x 50 m • Filling hose, red, 6 x 0.4 m • Venting hose, yellow, 6 x 0.4 m • Coupling C11, 12 pcs. • Plugs, yellow, 12 pcs. • Plastic clips, 200 pieces • Hose clips, 36 pieces. • Nail packers, two-piece, 12 pcs. • Foam rubber for nail packers, white/red, 6. pcs. each
