

RAPIDOBAT® lined

Formwork tube for very smooth concrete surfaces

The RAPIDOBAT® lined is a round formwork tube with a special foil insert. They are used to produce reinforced concrete columns with a very smooth concrete surface of the highest formlining class SHK3. The formwork tubes consist of multi-layered, robust paper and cardboard sheets that retain their shape even in driving rain. They have an integrated ripcord for easy stripping of the formwork. The formwork tube can also be used to protect uncured concrete. We provide this component with inner diameters from 150 to 1200 mm and a stock length of up to 7000 mm. Other diameters and lengths are available on request.

Products		∅	∅ ext	H _F	weight
310200001851	RAG 150-m	150 mm	157 mm	7000 mm	1,390 kg
