

RAPIDOBAT® rectangle

Formwork tubes for rectangular reinforced concrete columns

The RAPIDOBAT® rectangle is a formwork tube used to produce rectangular reinforced concrete columns. Concrete surfaces of particularly high quality can be produced using an insert made of specially coated MDF boards. The pipes consist of multi-layered paper and cardboard sheets that retain their shape even in driving rain. They have an integrated ripcord for easy stripping of the concrete column and can subsequently be used to protect uncured concrete. We provide this product in a stock length of up to 4000 mm and the inserts with dimensions from 174 x 240 to 400 x 500 mm. Other dimensions are also available on request.

Products		ø ext	weight
310400001780	RA4 175 240-m	309 mm	8,080 kg
