

## RAPIDOBAT® unlined

Formwork tube for smooth concrete surfaces

The RAPIDOBAT® unlined is a round formwork tube used to produce reinforced concrete columns with a smooth concrete surface and a faintly visible spiral pattern. The formwork tubes consist of multi-layered, robust paper and cardboard sheets that retain their shape even in driving rain. They have an integrated ripcord for easy stripping of the formwork. The formwork tube can also be used to protect uncured concrete. We provide this component with inner diameters from 150 to 1200 mm and a stock length of up to 7000 mm. Other diameters and lengths are available on request.

Products		weight
