

## RRD

### Cable tray reducer cover

The cable tray reducer covers RRD are suitable for RR cable tray reducers and protect them from dirt and moisture. They snap into place and interlock with the side rails. Just like the formed parts, the covers RRD are also available in three designs: centre, left and right. Specify the desired design and width when ordering. If the covers are to be used outdoors, additional securing brackets to protect against wind are required. We provide components in various materials and surface finishes to ensure that the corrosion requirements are met for all sorts of applications.
