

SA 2

Protection cap, cadmium yellow RAL 1021

SA 2 protective caps are suitable for channels KHAL 41, KHA 42, KHA 41, A 41 and are used to cover the profile ends. They are cadmium yellow to indicate possible joints and made of polyethylene. Maintain a distance of at least 50 mm to the end of the profile to ensure problem-free installation of the protective cap. Free of halogens, silicones and other additives that impair paint wetting.

steel, galvanic zinc plated
