

Shear Connector

For KUNEX® clamp joint

Shear Connector types M12, M16 and M20 are used to bond the anchor rods with the existing building. The clamp joint is fixed to the existing building using this shear connector system.

| Products | | weight |
|--------------|------------------|----------|
| 121000002913 | Kunex V Anker 12 | 0,020 kg |
| 121000002914 | Kunex V Anker 16 | 0,040 kg |
