

SINTON® X-T

The impact sound insulation element SINTON® X-T decouples stair landings from masonry or concrete walls. Like SINTON® X, it consists of a polyurethane box with integrated elastomeric bearings to transmit loads and a filler. The insulation element is also available with prefabricated reinforcement cage T1 or T2. The load-bearing capacity of the bracket when using the reinforcement cage is type-tested. SINTON® X-T conforms to fire resistance class R90. Different forces can be transmitted depending on how the thrust bearings are placed.

Products		W
410300025052	Sinton X1 T1	5,580 kg
410300025055	Sinton X1 T2	5,580 kg
410300025053	Sinton X2 T1	5,580 kg
410300025056	Sinton X2 T2	6,670 kg
410300025054	Sinton X3 T1	5,580 kg
410300025057	Sinton X3 T2	6,670 kg
