

## SKL M

### Beam clamp set

The beam clamp set SKL M can be combined with mounting channel KHA 2. It is used to fix KDU 60 bracket supports to steel beams. The set can be loaded up to 10 kN. The clamping range extends from 5 - 25 mm. We provide components in various materials and surface finishes to ensure that various corrosion protection requirements for different areas of application are met.

steel, batch/hot-dip galvanized
