

SLV

Ship cable ladder connectors

Ship cable ladders can be connected to each other or cable ladders and formed parts can be connected easily and quickly using the ship cable ladder connector SLV. It is pushed onto the rail of the ship cable ladder from the outside and bolted in place using the clamp fastener. The connecting rack is then pushed in and also bolted in place. The side connector is 38 mm high corresponding to the ship cable ladder and 120 mm long. We provide components in various materials and surface finishes to ensure that a wide range of corrosion requirements are met and that additional protective measures can be taken.

coated

Products	H	B	weight
SLV M	38 mm	120 mm	0,000 kg
incl.:			
2 × KLS 10X20F			

steel, bright rolled
