

UAA B 65

Cover

UAA B 65 components are cover plates from the underfloor system range. They are bolted onto a device carrier to cover the mounting hole and protect it from various external influences. The one-piece boards are made of sendzimir hot-dip galvanised steel according to DIN EN 10346 and are available in black (similar to RAL 9011).

Products	B	L	color	W
