

UBDSLFL

Levelling base

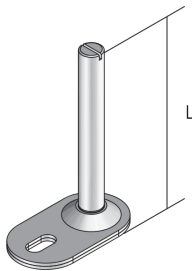

UBDSLFL product solutions are levelling bases that are used in floor sockets or false floor openings in conjunction with a levelling unit, but also with our screed-flush duct systems. These mounting components are suitable for high traffic loads and consist of a base plate and a levelling screw. The components are made of sendzimir hot-dip galvanised sheet steel in accordance with DIN EN 10346 and are available in lengths from 60 to 220 mm.

Products	L	weight
UBDSLFL 60	60 mm	0,054 kg
UBDSLFL 80	80 mm	0,057 kg
UBDSLFL 150	150 mm	0,076 kg
UBDSLFL 220	220 mm	0,102 kg
