

UBK

Lower part

UBK are bases for screed-flush heavy-duty floor ducts. The open duct bases are used for horizontal cable routing in demanding manufacturing areas such as the automotive industry. The components are made of sendzimir hot-dip galvanised sheet steel in accordance with DIN EN 10346 and have slots to accommodate the side profiles. These bases are 3000 mm long and available in various heights and widths. Special designs are also available on request.
