

UDAE22

Data connection box, 1x, 22.5x45 mm

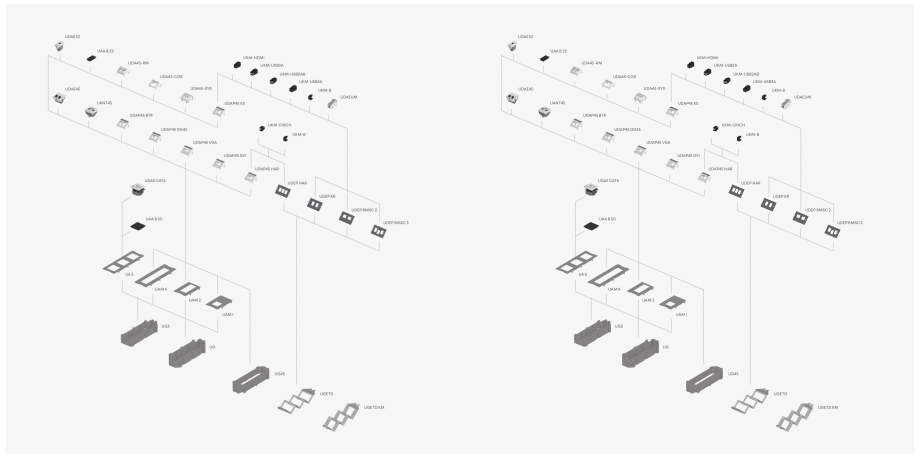

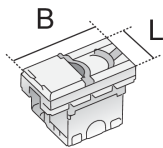

UDAE22 components are data junction boxes for equipping underfloor systems. They are part of the standard equipment of our BODO N single outlets. The 1x, 8-pole data outlets of the type Legrand Cat. 6A STP RJ45 (76573) units can be snapped into mounting holes measuring 45x22.5 mm and are therefore a very space-saving solution for the use of data technology in units with little installation space. The data junction boxes are made of high-quality polycarbonate in white.
