

UEBDME V

Cover insert, stainless steel tube outlet cartridge, 3x, angular

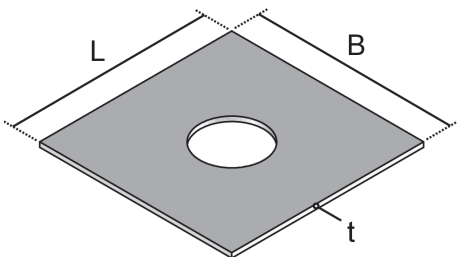

UEBDME V components are square cover inserts. These accessories are used as filling pieces to reduce the floor covering insertion depth in stainless steel tube outlet cartridges, which can be equipped with up to three mounting boxes. The white cover inserts from the range of installation units for underfloor systems are made from high-quality polyvinyl chloride hard foam and have a round outlet for tube units. They are 245 mm across and are made from material 6.0 mm thick.
