

UTG 75

Device separation plate

UTG 75 components are equipment dividers from the underfloor systems range. They are broken off at the side perforation and inserted into the mounting box from below. They safely separate different circuits and assemblies from one another to prevent malfunctions and faults. The partitions are made of high-quality ABS copolymer (ABS) in graphite black (RAL 9011).

Products	B	color	W
UTG 75	56 mm	RAL 9011 (graphite black)	0,004 kg

B: width
W: Weight per storage unit
