

UVA GB1

Earth wire

UVA GB1 components are earthing lines – tools from the range of stainless steel installation units. The cables ensure reliable earthing and equipotential bonding, for example as part of the UEBSEL earthing lug set. The accessories must be bolted in place on both sides. They are made of high-quality copper.

Products	W
UVA-GB1-2.5-15	0,000 kg
UVA-GB1-4.0-15	0,000 kg
