

WL V 200

Wide-span cable ladder connector, height = 200 mm

WL V 200 wide span connectors can be used to connect 200 mm wide-span cable trays together. They are 203 mm high corresponding to the height of the cable tray rail. One side of the connector is mounted as a floating bearing to allow for thermal expansion. The required screw fasteners (SEMSS/SEMB + US) must be ordered separately. The other side of the connector is formed as a fixed bearing. A minimum distance of 4 mm must be maintained between the cable trays. We provide components in various materials and surface finishes to ensure that various corrosion protection requirements for different areas of application are met.

steel, continuously hot galvanized/Senzimir process

Products	t	W
WL V 200S	2,50 mm	4,131 kg
incl.:		
8 x KLS 10X20		

steel, batch/hot-dip galvanized
