

WPKD

Wide-span crossing cover

The wide-span crossing cover WPKD is suitable for WPLK and WPRK wide-span crossings and protects them from dirt, moisture and UV radiation. It is placed on top of the crossing and secured with WPFDK or WPFDKA formed part cover clips. The latter are used if the cover is elevated. This improves the ventilation of the cables. We provide components in various materials and surface finishes to ensure that various corrosion protection requirements for different areas of application are met.
