

WPLAA 120

Wide-span cable ladder attachment branch, height = 120 mm

The wide-span cable ladder attachment branch WPLAA 120 allows the direction of cable routing to be changed in the form of a branch. It is suitable for wide-span cable ladders with rails 120 mm high and is 200 to 600 mm wide. The side rail of the main ladder is cut out at the point where the connecting rack is to branch off. The WPLAA attachment branch is positioned and bolted in place at this point. The connecting rack can then be pushed in. We provide components in various materials and surface finishes to ensure that various corrosion protection requirements for different areas of application are met.

steel, batch/hot-dip galvanized
