

WPRA 120

Wide-span cable tray branch, height = 120 mm

The T-shaped wide-span cable tray branch WPRA 120 with integrated side connectors allows the direction of cable routing to be changed in the form of a branch. It is suitable for wide-span cable trays with rails 120 mm high and is 200 to 600 mm side. It is used between two wide-span cable trays. The connection tray can then be pushed in with a VB floor connector. We provide components in various materials and surface finishes to ensure that various corrosion protection requirements for different areas of application are met.

steel, batch/hot-dip galvanized
