

Solar fence AGRI-PV

Generate energy,
preserve agriculture.

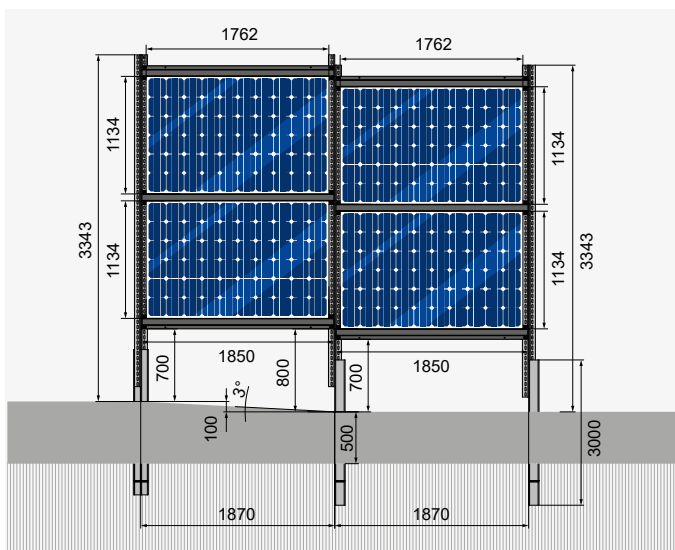

Product innovation
2025

PohlCon Solar – Expertise for the energy of tomorrow.

As part of the renowned PohlCon Group, we combine decades of experience in the construction industry with pioneering solutions for the photovoltaic sector. We focus on the development and production of high-quality mounting systems for ground-mounted systems – made in Germany.

- on the market since 2009
- total output 2 GW
- a company based in Berlin, Germany
- part of the PohlCon Group with over 60 years of experience in the construction industry
- in-house production and development in Germany

View of solar fence AGRI-PV

Solar fence AGRI-PV – Double the impact of your space.

The solar fence AGRI-PV by PohlCon Solar is an innovative solution that enables the simultaneous utilisation of agricultural land and the generation of renewable energy. The design is specially tailored to the requirements of agrivoltaics and combines robust technology with practical agricultural suitability.

Technical features

- module orientation:
horizontally arranged solar modules in east-west direction
- mounting per field:
modules in two rows, space-saving and efficient
- ground clearance:
approx. 80 cm distance between the lower edge of the module and the ground – ideal for mowing work and agricultural use
- foundation:
solid pile-driven foundation for safe absorption of wind loads
- module flexibility:
module fields can be adapted topographically in stages and can be configured for different module types

The solar fence AGRI-PV was developed in such a way that the use of agricultural machinery is still possible without any problems. Benefit from the sustainable dual utilisation of your land without any loss of yield.
